# REVERSE SHELL USING TCP SOCKET

EX:NO:8

AIM:

To develop a TCP socket based client server program for communication between two systems.

PROCEDURE:

* Import the socket module
* Create a TCP socket using SOCK.STREAM.
* Bind the server to 127.0.0.1 and port 5000
* Start the server and wait for a client connection.
* Connect the client to server.
* Send and receive messages using send() and recv()
* Terminate the connection using exit.

RESULT:

Thus, a TCP socket based client-server communication program was successfully executed on local host.
